

# INTRODUCTION

The two-book series *Password: Communication for Bigger Kids* is designed for young learners who are about nine years old.

The objective of the series is to teach children how to communicate in English. Real-life dialogues are presented in the lessons and form the basis for the learning process, which takes place through oral and written activities, songs, cartoons, games, and curiosities. One situation of this book features a TV commercial, which gives the students further contact with natural forms of expression thereby enriching their learning experience. In PCBK students will learn to distinguish between similar sounds, to recognize vocabulary, and to listen for main ideas through diversified listening comprehension activities.

The diversity of activities ensures a dynamic learning environment which is especially enjoyable for children. Interactivity in the classroom brings the material alive and allows learners to communicate naturally while engaged in activities that are in perfect harmony with the interests of their age group.
